## FOREWORD

This Classification List of Secondary Schools is compiled in accordance with Section 2304 of the School Code which provides that the Department of Public Instruction shall have power to classify high schools. The Classification List presented herewith is for the school year 1926-27.

Classification is made annually on the basis of reports submitted by the local school authorities, county superintendents, and representatives of the Department of Public Instruction.

Part I of this report outlines the requirements which must be met by the various types of secondary schools in order that they may receive classification.

Part II presents the classification of each secondary school, together with certain other data relating to the school.

Part III of the report consists of tables summarizing important facts included in the body of the report. An analysis of these data reveal five definite trends in the development of the secondary schools of the Commonwealth.

- a. An increasing number of schools are reorganizing on the junior high school basis, either as junior or junior-senior high schools.
- b. An increasing number of schools are meeting the requirements for full classification.
- c. The secondary school enrollment shows a consistent increase for each year of the secondary school period. The number of pupils remaining for graduation is also increasing.
- d. Pupils living in districts where no high school is maintained are more and more availing themselves of high school opportunity in nearby districts.
- e. There is a decreasing number of schools offering work in addition to the years for which they are legally approved.

In these developments we see a desire on the part of the people of the Commonwealth for extended secondary school opportunity.

July 15, 1927

JOHN A. H. KEITH,  
*Superintendent of Public Instruction.*

## **PART I**

### **REQUIREMENTS FOR THE CLASSIFICATION OF SECONDARY SCHOOLS**

#### **I. REQUIREMENTS OF THE SCHOOL CODE.**

Section 2904 of the School Code provides that the Department of Public Instruction shall have power "to classify the high schools of the State upon the basis of the reports of the directors and the State inspectors of high schools, in compliance with the provisions of the school laws."

Section 1701 outlines the following general provisions for the classification of secondary schools:

- A. A school year of at least 180 days.
- B. Types of high schools and minimum number of teachers:
  - 1. Four Year High School (years 9-12) minimum number of teachers, three.
  - 2. Three Year High School (years 9-11) minimum number of teachers, two.
  - 3. Two Year High School (years 9-10) minimum number of teachers, one.
  - 4. Junior High School (years 7-8-9 or 7-8-9-10) minimum number of teachers, four, except in small rural communities where enrollment is small, a minimum of two or three teachers may be approved if part-time teachers are also available for special subjects.
  - 5. Junior-Senior High School (years 7-12) minimum number of teachers, five.
- C. All high schools are required to conform to the regulations established by the Department of Public Instruction.

#### **II. ESTABLISHMENT OF NEW HIGH SCHOOL OR ADDITION OF YEAR TO PROGRAM OF STUDIES.**

The approval of the Department of Public Instruction and the county superintendent is required previous to the establishment of a new high school or the addition of a year of work to the program of a high school already in operation in a fourth class district.

### III. REGULATIONS OF THE DEPARTMENT OF PUBLIC INSTRUCTION.

#### A. Basis for Determining Classification.

As provided for in Section 1701, the following regulations have been formulated by the Department of Public Instruction for classification of secondary schools. Approval of a plan of organization or program of studies does not automatically classify a school. Classification of a new school or reclassification of an established school on a higher rating is given after the school has been in successful operation on the new basis for the major portion of a year and upon evidence that standards are being met as shown by:

1. Reports from local school authorities and the recommendation of the responsible superintendent of schools.
2. Report of visit by representative of the Department of Public Instruction.

Superintendents desiring to have the classification of any schools, under their respective jurisdictions, reviewed for the purpose of changing the current classification should send a list of such schools annually to the Department not later than November 15th.

#### B. Standards for Classification.

##### 1. Building.

For a Four Year High School at least three rooms adapted for assembly, library, and class purposes with one room equipped for science laboratory work, are necessary.

A Three Year High School requires at least two rooms adapted for library, laboratory, assembly and class room purposes.

A Two Year High School requires at least two rooms adapted for library, laboratory, and class room purposes.

A Junior High School building requires facilities for the various phases of the junior high school program. This includes class rooms, library, laboratory, health and practical arts rooms.

The Junior-Senior High School requires the facilities of both a Senior High School and a Junior High School.

The location and construction of the building, the decoration of the building, and the up-keep of building and grounds, the lighting, heating, and ventilation of the school rooms, the condition of lavatories and closets, water sup-

ply, furniture, apparatus, and the methods of cleaning are such as to secure hygienic conditions for both teachers and pupils.

## 2. Equipment and supplies.

### a. Science Laboratory.

Adequate laboratory furniture and apparatus are to be supplied for all secondary schools. The type and amount of equipment will depend upon the science program of the school (See Science Equipment Lists). Proper storage space is required for apparatus and supplies.

### b. Library.

(1) For a Four Year High School the initial basic collection includes at least 300 to 400 well-selected volumes; for a Three Year High School 250 to 300 volumes; for a Two Year High School 200 volumes; for a Junior High School 300 volumes; for a Junior-Senior High School 500 volumes. (See Library Manual and Reference List.)

(2) When the library is not housed in a separate library room, proper shelving should be supplied in a class room or the study hall. Organization of the library for effective use is essential. It is also necessary to make provision for the growth of the library. The yearly budget should provide an appropriation for this work.

(3) Sufficient number of periodicals to meet the class needs of the school forms a part of the library equipment.

c. Sufficient texts, class and outside reading material, and adequate supplies to carry on effectively the work of instruction are to be provided.

## 3. Program of Studies and Plan of Organization.

The program of studies and plan of organization must conform to the standards of the Department of Public Instruction for the type of school operated and must be approved by the responsible superintendent of schools.

## 4. Requirements for Graduation.

A classified Four Year High School requires for graduation the completion of a four year secondary school course covering not fewer than sixteen units. Of the sixteen units, three

units of English, two of social science, including American History or Problems of Democracy, one of science in addition to general science, one unit of mathematics, should be required of all pupils graduating. Graduation from a Senior High School should be based upon the successful completion of a junior high school program of studies and twelve units of work in approved subjects in grades ten, eleven, and twelve. Music, one period, physical education, two periods, and health education, one period each week, should be required of all pupils throughout the secondary school course.

A unit represents the work done in a given subject in a standard school year requiring approximately one-fourth of the student's time and aggregating not fewer than 120 hours of prepared class room work. A standard school year shall consist of not fewer than 180 days. Two hours of shop or laboratory work are considered equivalent to one hour of prepared work.

Exclusive of time in changing classes the minimum length of recitation periods is forty minutes. A longer period is recommended in order to provide more adequately for directed learning.

5. Methods of Instruction, Supervision, Morale.

Methods of instruction, provision for school supervision, pupil attitude, professional activity of teachers, and general morale of school must be such as are conducive to satisfactory pupil achievement.

6. Teacher Preparation and Certification.

College graduation should be the standard of preparation for all secondary school teachers. The majority of teachers in a classified Senior or Four Year High School are required to be holders of college certificates. Schools wishing to qualify for Senior or Four Year High School classification should require teachers already in service who do not have this standard of certification to continue their preparation to the college level. The School Code requires that all teachers in secondary schools be properly certified in the specific subjects which they teach.

7. Teaching Load.

Pupil teacher ratio, number of classes taught daily by teachers, and the number of students in each class must be such as to make effective work possible. The standard should be: Pupil-teacher ratio on basis of average daily attendance, not greater than 30; number of classes taught by teachers, six daily in small schools, five in larger schools; not more than 35 pupils in any class (30 recommended as standard); and the number of pupil hours per teacher not more than 150 per day.

8. Pupil Load.

The usual pupil load should not exceed twenty periods of prepared recitation work weekly, exclusive of health, music, and activities. Only pupils ranking well above the average should be permitted to carry a program requiring more than this standard.

9. Records.

Accurate and complete records of attendance, scholarship, and school organization, should be kept in such form as to be conveniently used and safely preserved.

# PART II

## TEN HIGH POINTS IN THE DEVELOPMENT OF SECONDARY EDUCATION IN PENNSYLVANIA FOR THE YEAR 1926-27

A comparison of the status of public secondary education in Pennsylvania in 1926-27 with 1925-26 indicates the following developments:

### 1. AN INCREASING NUMBER OF PUBLIC SECONDARY SCHOOLS ARE MEETING THE STANDARDS FOR A FOUR YEAR OR SENIOR HIGH SCHOOL CLASSIFICATION.

In 1925-26, 634 public secondary schools were classified as Four Year and Senior High Schools; in 1926-27 schools meriting this classification numbered 696; a net increase of 62. During the same period, the number of schools classified as Three Year High Schools decreased from 197 to 158 and schools classified as Two Year High Schools decreased from 164 to 137. Forty-five rural communities are operating rural vocational schools.

### 2. THERE HAS BEEN A CONSISTENT INCREASE IN THE NUMBER OF SCHOOL DISTRICTS MAINTAINING PUBLIC JUNIOR HIGH SCHOOLS.

In 1925-26, 136 school districts were operating approved public junior high schools as part of their secondary school organization. In 1926-27, 162 secondary schools had approved junior high school organizations; a net increase of 26 schools.

### 3. PUBLIC SECONDARY SCHOOL ENROLLMENT HAS INCREASED.

The total public secondary school enrollment for the year 1926-27, including pupils enrolled in the 7th, 8th, and 9th grades in junior high schools, was 312,036. This was an increase of 21,161 over the public secondary school enrollment of the preceding year.

### 4. THE ENROLLMENT IN EACH YEAR OF THE PUBLIC HIGH SCHOOL HAS SHOWN A MARKED INCREASE.

The net increase in total enrollment of 1926-27 over 1925-26 was 21,161. This increase was distributed as follows:

|               |       |                |       |
|---------------|-------|----------------|-------|
| 7th year..... | 3,547 | 10th year..... | 3,331 |
| 8th year..... | 3,660 | 11th year..... | 3,252 |
| 9th year..... | 5,424 | 12th year..... | 1,947 |

### 5. THE NUMBER OF PUBLIC SECONDARY SCHOOL TEACHERS HAS INCREASED PROPORTIONATELY TO THE INCREASE IN ENROLLMENT.

The total number of teachers employed in public secondary schools for the year 1926-27, including full-time and part-time teachers, was 13,694; an increase of 930 teachers over the preceding year. For the year 1926-27, 504 teachers were reported as employed part-time as compared with 743 the previous year. The enrollment per teacher in Pennsylvania's public secondary schools is approximately 23 pupils.

**6. PUPILS IN INCREASING NUMBERS ARE COMPLETING FOUR YEAR AND SENIOR HIGH SCHOOL COURSES.**

During the school year 1925-26, 35,043 boys and girls completed courses in Four Year and Senior Public High Schools as compared with 32,451 in June, 1925; an increase of 2,592. Pupils completing courses in Three Year Public High Schools decreased 1,049 and the decrease of pupils completing courses in Two Year Public High Schools was 749. This decrease in the number of pupils completing courses in Three Year Public High Schools and Two Year Public High Schools has not been due to lack of interest and belief of the smaller communities in secondary education, but to the fact that more and more the smaller communities are raising their standards of high school facilities to those of the four-year secondary school organization, are combining with other districts to form complete secondary schools, or are sending their pupils to schools having more adequate facilities.

**7. THE ADVANTAGES OF A LARGER UNIT OF SCHOOL ADMINISTRATION FOR SECONDARY EDUCATION ARE BEING RECOGNIZED.**

During 1926-27, 49 secondary schools were reported as joint schools; of this number, 42 were operating by the joint agreement of two districts; 4 by the joint agreement of 3 districts; and 3 by the joint agreement of 4 districts.

**8. PENNSYLVANIA'S PUBLIC SECONDARY SCHOOLS ARE ADAPTING THEIR COURSES OF STUDY TO THE LIFE-NEEDS OF THE BOYS AND GIRLS OF THE COMMONWEALTH.**

Pennsylvania's public secondary schools provide general education for culture and civic competency, preliminary preparation for the professions and specific preparation for commerce, industry, agriculture, and homemaking. Of the 35,043 boys and girls who completed courses in Four Year and Senior High Schools during the year 1925-26, 23.6 per cent. entered colleges and universities; 21.9 per cent. secured employment in stores and offices, 11.6 per cent. entered normal schools; 7 per cent secured employment in factory trades; 6.3 per cent. remained at home; 6.2 per cent. secured miscellaneous employment; 3.7 per cent. entered commercial schools; 3.7 per cent. engaged in teaching; 3.2 per cent entered schools for nursing; 2.3 per cent. entered higher institutions of various types; 1.3 per cent engaged in farming; 1 per cent, returned to the high school for postgraduate work; and 8.2 per cent were unaccounted for.

**9. THE INFLUENCE OF THE PUBLIC HIGH SCHOOLS OF PENNSYLVANIA IS EXTENDED BEYOND THE CONFINES OF THE DISTRICTS OPERATING THE SCHOOLS.**

During the year 1926-27, 38,584 boys and girls, residing in districts without resident high school opportunity, attended high schools in neighboring districts. This non-resident group, an increase of 2,084 over the previous year, comprised 12 per cent. of the total enrollment.

**10. RELATIVELY LARGER PROPORTIONS OF THE POPULATION OF PENNSYLVANIA ARE SECURING SECONDARY SCHOOL EDUCATION.**

In 1900 the enrollment in grades 9 to 12 of Pennsylvania's public high schools was the equivalent of 4 out of every thousand population; in 1910, it was the equivalent of 6 out of every thousand population; in 1920, 17 out of every thousand population were enrolled in grades 9 to 12 in the public high schools; and in 1926-27, 25 out of every thousand were receiving high school instruction.
